Learner Guide

AWS Classroom Training

OVERVIEW

The AWS classroom training experience has been reimagined! With AWS Skill Builder and the myClass dashboard, learners can now manage every step of their training journey, from finding and enrolling in classes to completing evaluations and downloading certificates, all in one easy-to-use interface. This guide walks you through the new learner experience, showing how to access, attend, and get the most out of your classroom training on AWS Skill Builder.

Getting Started

What to Expect

To participate in AWS classroom training, you must have an AWS Skill Builder account associated with your organization. Your Learning Administrator is responsible for adding you, and you are responsible for signing in and accepting the Terms and Conditions and Organization Data Access Notice.

If this is your first time using AWS Skill Builder, you'll receive an email notification once your organization's Learning Administrator has added you to the system. After this initial email, you'll receive a second notification about your classroom training. The notification will vary depending on how your Learning Administrator has shared the training with you.

If you're an existing learner (already participating in classroom training or digital training under a Team Subscription), you'll only receive the second notification about your classroom training.

Notification Types

You will receive different types of notifications depending on how your classroom training is shared by your Learning Administrator.

Automated System Notifications (E-mail)

- Assignment Confirmation — Sent automatically when your Learning Administrator assigns you to a class that you can review and decide whether to enroll in.
- Registration Confirmation — Sent automatically when you are proxy enrolled by your Learning Administrator, either because the class is mandatory or because you have already confirmed your participation in the class.

Direct Invitation from Learning Administrator

- This notification is not system-generated. Your Learning Administrator will manually share a registration link for the class.

Next Step: After receiving any of these notifications, go to myclass.skillbuilder.aws and sign in using your designated sign-in method (SSO, AWS Builder ID, or APN account). The required sign-in method will be indicated in your automated notification. If you received a direct invitation from your Learning Administrator and are unsure which method to use, please confirm with them before signing in.

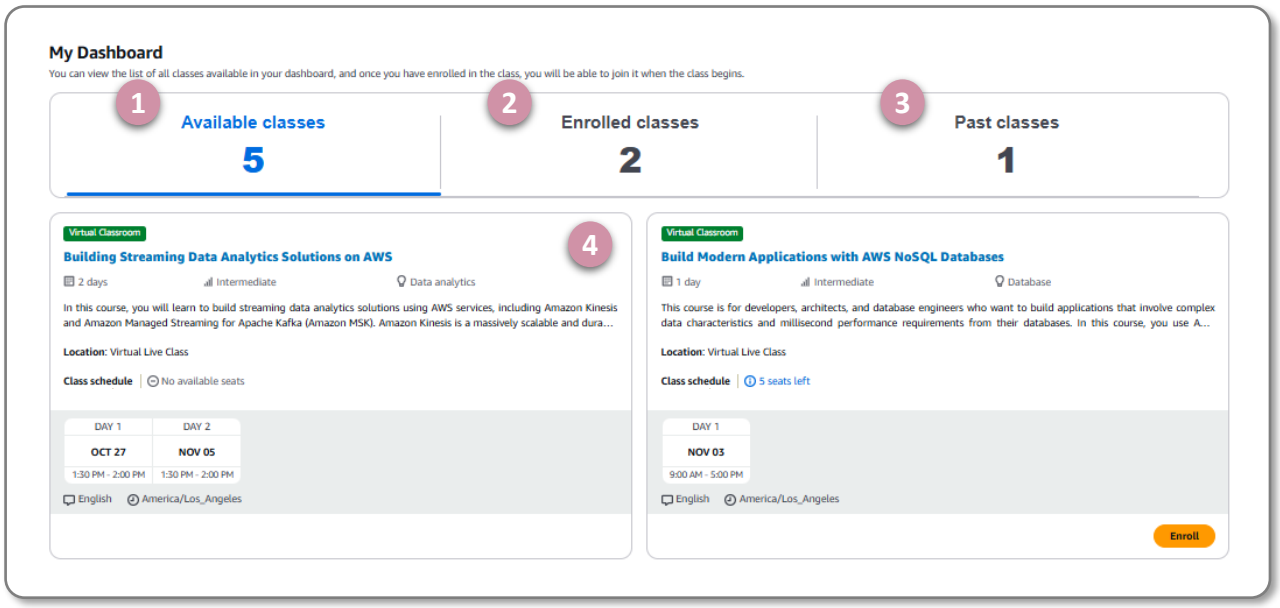
Access your myClass dashboard

https://myclass.skillbuilder.aws/

Classroom training and digital training are managed through different interfaces within AWS Skill Builder. To access your classroom training, go directly to myclass.skillbuilder.aws using the URL link (Note: myClass is not yet accessible from the main Skill Builder digital training dashboard)

After signing in, you'll land on your myClass dashboard — your dedicated space for managing classroom training. Classes shared with you will appear as tiles, organized under tabs based on their status.



1. **Available Classes Tab**: Displays all classes your Learning Administrator has shared or assigned to you. You may review the class details and seat availability and choose whether to enroll.

2. **Enrolled Classes Tab**: Displays all classes you have enrolled in yourself, or that your Learning Administrator has proxy enrolled you in. You will navigate to the class tile under this tab on the day of training to join the virtual classroom (for virtual classroom training), and access labs.

3. **Past Classes Tab**: Displays all classes that have already ended. Both classes that were shared (that you did not enroll in), and classes that you attended will move under this tab once the date has passed. Classes you attended will show status "Attended"

4. **Class Tile**: Each shared class appears as a class tile, showing key details such as schedule, location, and availability.

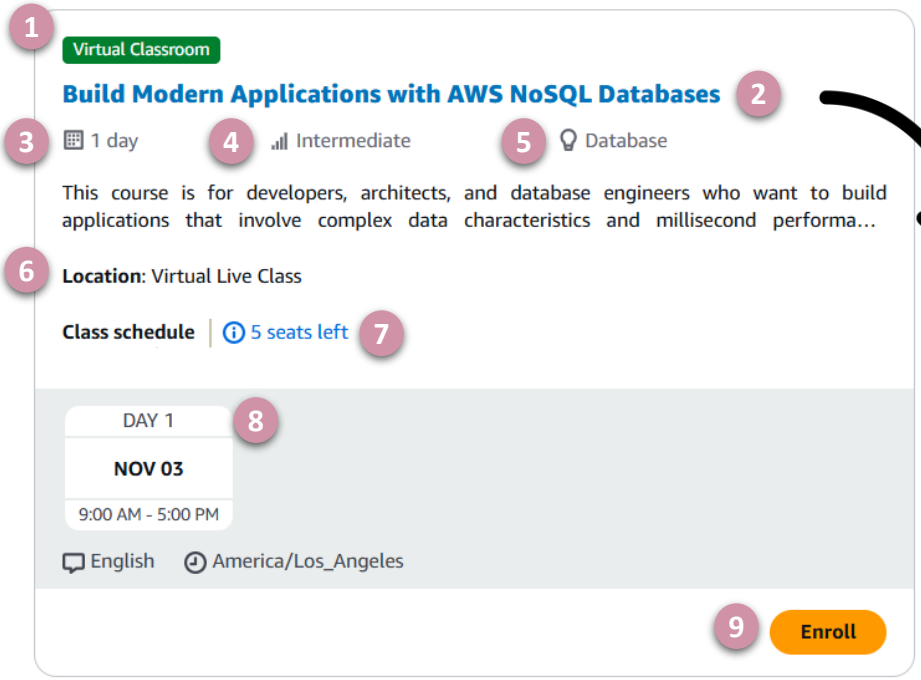
Review Class Details on the Class Tile

Each class tile on your myClass dashboard will display important class details



1. Modality: Virtual Classroom or Classroom (In-Person)
2. Course Title (if clicked will open course detail page with a full course overview and outline)
3. Course duration
4. Course Level
5. Domain / Area
6. Location: Virtual or Address
7. Availability / Status
8. Class schedule
9. Buttons

A minimized version of the class tile will be displayed on the course detail page ↓

BUTTONS

The class tile will display different buttons depending on the status of the class.

- **Enroll** – displayed when the class is under the Available classes tab
- **Withdraw** – displayed when you are enrolled and the class is under the Enrolled classes tab
- **Join Training** – displayed 15 minutes prior to start time for virtual classes
- **AWS Builder Labs** – displayed on a class tile when the class is in progress and for up to 5 weeks after a class has ended
- **Evaluation Survey** – displayed on a class tile once the class is in progress until a response has been recorded
- **Certificate** – displayed on classes under the Past classes tab that you have been marked "Attended"

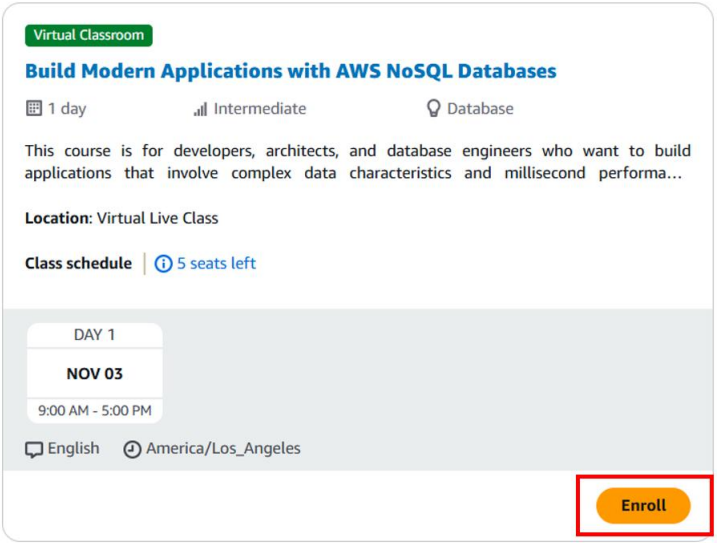
Enroll in a Class

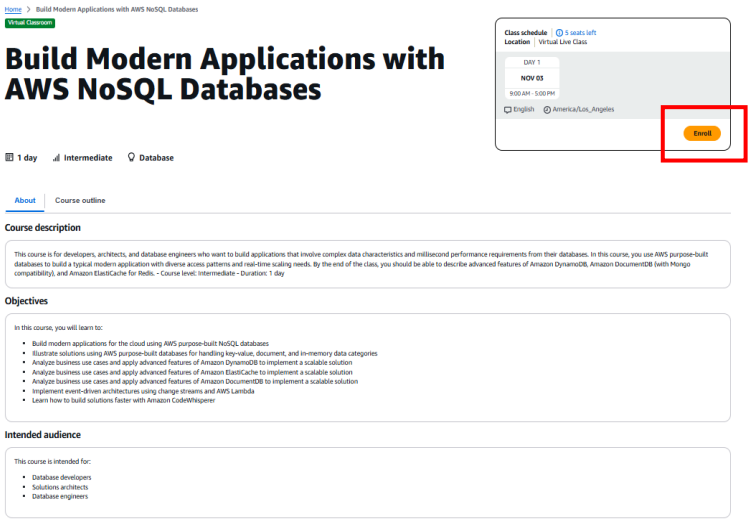
If your Learning Administrator has left enrollment up to you, go to the Available classes tab to review the classes that have been shared with you, or use any registration links your administrator has provided to view class details. When you find a class that fits your schedule and learning goals, simply click Enroll and you will receive a Registration Confirmation email. If you have already been proxy enrolled in a class, you can skip this step.

Enroll from the Class Tile



- To view the full course description and more details on the class click on the course title.
- Confirm the remaining number of seats available. If there are seats available you will see an “Enroll” button on the bottom right corner of the class tile. If the class is at capacity you will see no button or a “Waitlist” button depending on whether the waitlist has been enabled by your Learning Administrator
- If you have reviewed the class details and are interested in participating, click on the “Enroll” button. The class tile will move under the “Enrolled classes” tab of your dashboard.

Enroll from the Registration Link



- After clicking the registration link shared by your Learning Administrator, you’ll be prompted to sign in using your designated sign-in method.
- Once signed in, you’ll land on the course details page, where you can review the course description and class schedule.
- If you have reviewed the class details and are interested in participating, click on the “Enroll” button. The class tile will move under the “Enrolled classes” tab of your dashboard.

Prepare for your Class

Please make sure to complete all the steps on this page before your class so you can enjoy a seamless learning experience.

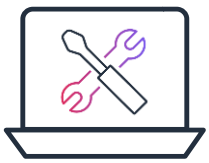
Create a Gilmore eVantage Account

If your course is listed below, you can skip this step.

•AWS Cloud Practitioner Essentials Day
•AWS Business Essentials Day
•AWS Technical Essentials Day
•Exam Readiness Workshops
•AWS Jam

1. If your course is **not** listed, create a Gilmore eVantage account to access your class's digital e-books. Use the same email address you used to register to class. E-books will be distributed by your instructor on the first day of training.
2. If your class has labs, you can access both your e-books and labs on the day of training from the AWS Builder Labs button on your class tile. If prompted, sign in with the same email address and password used to register for class.

(Virtual Only) Check your System Requirements for Webex



1. You need a laptop or desktop computer with wired or wireless internet access.
   If you use Mac, please disconnect from VPN, if possible, to reduce lag.
2. Check that your computer/internet connection meets the Webex system requirements.
3. Run a test session to get familiar with the environment and controls.
   - If you don't already have the Webex desktop app installed, you'll be prompted to click the installer file.
     On Windows, click Webex.exe. On Mac, click Webex.pkg.
   - Download the Webex desktop app for best results. If you are unable to download, you may use Chrome or Firefox to launch the training via web browser.
4. Start a Cisco Webex Network Test to validate whether your current settings are optimal to run Webex services, specifically for the speed of the network using TCP and UDP, and port connectivity.
5. To successfully complete the hands-on labs, your device should be able to:
   - Use Chrome or Firefox browser (Internet Explorer is not supported)
   - Connect to a Windows Remote Desktop using any standard RDP client
   - Edit commands using a text editor. A professional text editor (e.g.: NotePad++, Sublime Text, Atom) is highly recommended
   - You may wish to use a secondary device such as a tablet to review documentation while you work on your main device

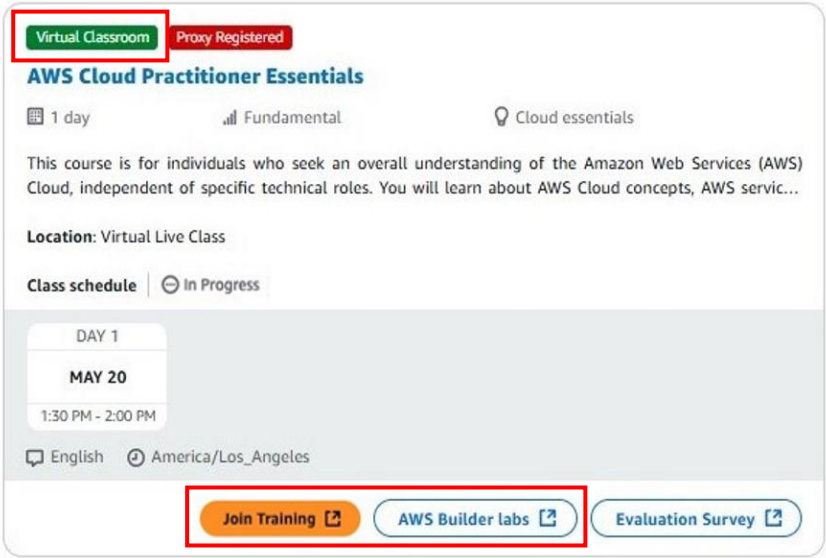
Join your Class

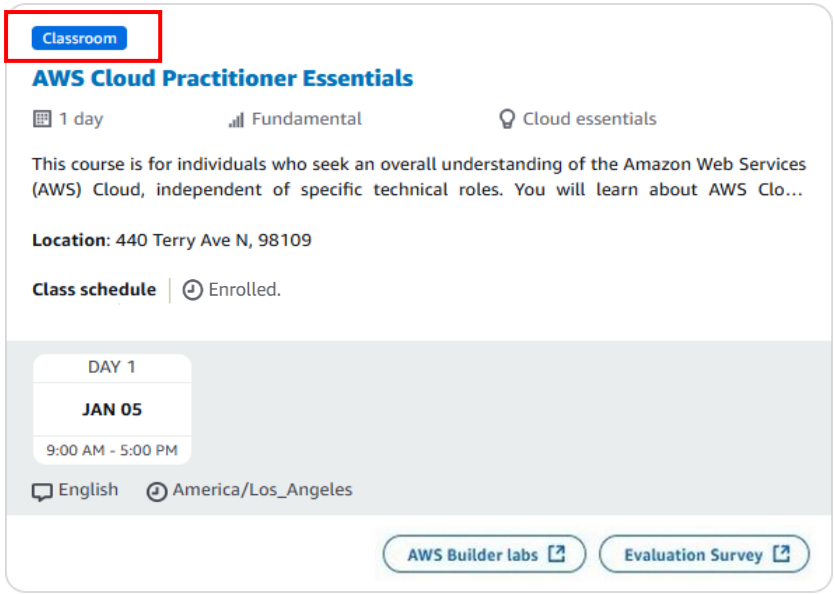
Navigate to your myClass dashboard on the day of your class to join your virtual classroom (for virtual classes) and access your labs and textbooks.

Virtual Classes



- You will receive an email reminder 15 minutes prior to class start
- The "Join Training" button will appear on the class tile automatically 15 minutes before class and will connect directly to the virtual classroom. Please note, some companies do not use Webex for their trainings. If your Learning Administrator has designated a different platform please check with them for the link to join.
- Access labs and textbooks by clicking on the AWS Builder Labs button.

In-Person Classes



- Check the venue information on the class tile and registration confirmation email or check with your Learning Administrator. Follow any venue specific instructions shared by your administrator
- If your class is held in an AWS Office, ensure you bring an ID that matches the name you used when registering.
- Bring a working laptop to access labs and textbooks. You will access labs and textbooks by clicking on the AWS Builder Labs button.

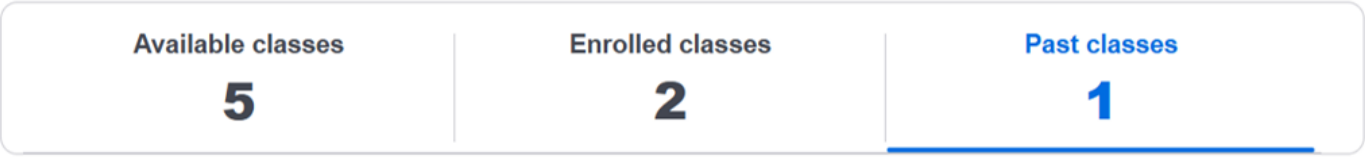
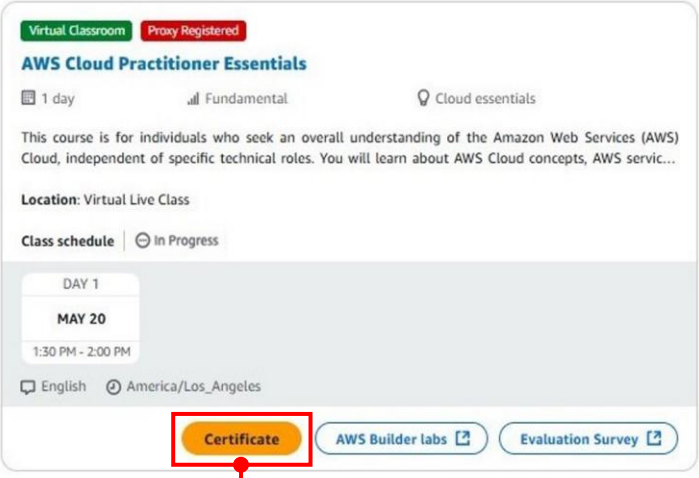
After your Class

After your class ends, navigate back to your myClass dashboard to submit an evaluation survey and download your certificate of completion.





- The class tile will move under the “Past classes” tab once the class ends
- AWS Builder Labs will remain available for up to 5 weeks after class ends.
- The Evaluation Survey button remains visible until a response is submitted. Once you complete the survey, the button will no longer appear on the class tile.
- The Certificate button will appear once you have been marked as “Attended.”

The name on the certificate of completion will appear on the certificate as it is set in your AWS Builder ID profile

NOTIFICATIONS

- **Class Ended** — Sent to all enrolled learners to inform you that the class has ended.
- **Completion Confirmation** — Sent to learners marked as “Attended” to congratulate you and remind you to complete the evaluation survey and download your certificate of completion from the class tile.
- **Evaluation Survey Reminder** — Sent if you have not submitted your evaluation survey within 24 hours after the class ends. (Subject: "Tell us about your training experience...")

Getting Support

Please refer to our FAQs for answers to the most common questions about classroom training. If you can't find the information you're looking for, please contact your regional support team using the list below. If your region is not represented, reach out to your organization's Learning Administrator, or submit a ticket to Customer Support here.

Region	Contact
North America	aws-training-coord-amer@amazon.com
Latin America	aws-latam-tc-operations@amazon.com
Europe, Middle East, Africa	aws-emea-training-ops@amazon.com
Australia, New Zealand	anz-trainingops@amazon.com
India	aws-india-training-tc@amazon.com
Korea	aws-kr-training-support@amazon.com
China	aws-education-cn@amazon.com

Common Issues

Not receiving email notifications	- Verify email address is correct and current - Check spam/junk folders - Add AWS domains to email allowlist - Confirm organization settings allow external notifications
Can't access myClass	- Ensure you are accessing: https://myclass.skillbuilder.aws - Verify your organization's sign in method - Ensure you have accepted Terms & Conditions - Try different browser or clear cache
Join training button not appearing	- Verify that your class is virtual - Wait until 15 minutes before class start time - Verify that you are enrolled in the class - Refresh browser page
